# 1 HPE Gen10 Reference Architectures

## 1.1 HPE Gen10 All-Flash Configurations

### 1.1.1 HPE DL380 Gen10 and D3710 All-Flash

NexentaStor All-Flash configurations deliver high IOPS and sub millisecond latency for small random IO workloads that are typical of databases and high performance private cloud (VMware, OpenStack and Hyper-V) environments.

**Note 1:** BIOS for HPE DL380Gen10 should be v1.36. As of NexentaStor 5.2.1, FW 1.46 is supported with the limitation of NEX-19875 (one of the 2 ports of LOM 622FLR-SFP28 fails to come up).

**Note 2:** The configurations assume that up to 2 storage enclosures can be dual path daisy chained off a single E208e-p adapter.

**Note 3:** Use dual SAS path for configurations with up to 4 enclosures.

## 1.2 HPE Gen10 Hybrid Configurations

NexentaStor Hybrid configurations deliver balanced performance and are great for general purpose private cloud (VMware, OpenStack and Hyper-V) storage backend, generic enterprise file services, and low TCO backup and archive use cases.

## 2 About Nexenta

Nexenta is the global leader in Open Source-driven Software-Defined Storage (OpenSDS). Founded in 2005 with 6,000+ customers and more than 1,500 petabytes of storage under management, our privately held company delivers **100% Software**-based storage solutions, providing organizations with **Total Freedom** to choose an easy-to-use, secure and ultra-low cost storage solution to fit their needs. Nexenta enables everyday apps; from the Internet of Things to Big Data; from OpenStack to Containers – and all types of Clouds – Private, Public, and Hybrid. Founded around an open source platform and industry-disrupting vision, Nexenta delivers its award- and patent-winning software-only unified storage management solutions 24x7 - around the globe - service and support. Nexenta has an **All Love** approach with its global partner network, including solution integration with top hardware partners to deliver validated and certified OpenSDS solutions to fit your business requirements.
